## *California Family Health Council, Inc.*

The California Family Health Council (CFHC) is a non-profit organization working to improve the health for California families by increasing access to family planning, improving reproductive health care and ensuring access to health services. CFHC also develops effective solutions to health care challenges, conducts cutting edge contraceptive research and serves to inform the public, health professionals and policy makers about health issues.

For 22 years, this conference has provided clinicians and health educators with an opportunity to access the most current information in the field of reproductive and primary health care. This year the tradition continues with new pre-conference sessions and concurrent workshops throughout the Symposium to give clinicians the knowledge and skills necessary to deliver quality care in today's challenging world.

### *Symposium Objectives*

Upon completion of the Reproductive Health Medical Symposium, participants will be able to:

- ✔ Discuss the key findings of the Women's Health Initiative and explore expert opinion on the uses of hormone therapy.
- ✔ Describe the latest contraceptive technologies.
- ✔ Discuss conventional and complementary therapies available for treatment of peri-menopause and menopause symptoms.
- ✔ Define symptoms and treatment options of Irritable Bowel Syndrome and other gastrointestinal disorders.
- ✔ Describe California's HIV Non-Name Reporting System and specific provider responsibilities related to that system.
- ✔ Identify patients who could benefit from screening for inherited risk for breast and ovarian cancer and discuss treatment options.
- ✔ Describe how to proceed with a client who presents with an abnormal pap smear.

# AGENDA

## PRE-CONFERENCE DAY

### Wednesday, May 14, 2003

8:30 AM - 5:00 PM

#### Reducing Teen Pregnancy: Helping Teens Make Healthy Decisions

Charles Marquardt and Andria Hancock-Crear, MPH  
California Family Health Council, Inc.

Health care providers have an important role to play in reducing teen pregnancy. Research has repeatedly shown that teens make healthy decisions when given medically accurate, comprehensive information about their bodies and reproductive health. Talking with teens about sexuality issues is not easy, but it is important that as adults, who work with teens, we develop these skills. This training is intended for health care providers who want to improve their ability to work effectively with the youth they serve. This interactive one-day workshop is designed to give you the tools to communicate well with teens about sex and sexuality topics.

Funded by a grant from  
The California Wellness Foundation

1:00 PM - 5:15 PM

#### CPT Coding for Reproductive Health Care Providers

Michael Policar, MD, MPH  
Northbay Medical Group

Whether you work in a private practice, clinic or hospital setting, there is a growing expectation that clinicians practice accurate and complete CPT and ICD-9 coding. This four-hour workshop covers everything that the reproductive health care professional needs to know regarding CPT, E&M and ICD-9 diagnosis coding, whether in the office or hospital. Case studies will be used to exemplify optimal coding of office procedures, office and hospital visits and screening visits. The unique coding considerations that apply to advance practice nurses and physician's assistants will be detailed.
